Dear Ma'am or Sir,

Good day.

We, the residents of **Cambridge Subdivision in Iponan, Cagayan de Oro City**, are respectfully seeking your urgent assistance regarding the severe and continuing water service problems in our community.

For approximately **months now, our subdivision has had little to no water supply during the daytime**. Water usually becomes available only after midnight, and even then, the water pressure is extremely low. This makes it very difficult, and sometimes nearly impossible, for residents to perform basic daily activities such as cooking, bathing, washing dishes, cleaning, and maintaining proper sanitation.

Residents have been forced to stay awake until the early hours of the morning just to collect and store enough water for the following day. Many have also had to manually haul buckets of water, which has become physically exhausting, particularly for elderly residents and those with health concerns.

The situation has already taken a serious toll on our community. One of our neighbors recently suffered a heart attack, and the extreme stress and physical strain associated with having to secure water has raised serious concerns among residents about the health consequences of this ongoing situation.

We have already reported the matter to our **Homeowners' Association, our Barangay Captain, and the Cagayan de Oro Water District (COWD)**. Unfortunately, despite these reports, there has been **no meaningful improvement in the water service**.

We understand that water supply problems can occur and that repairs or other technical issues may require time. However, three weeks of severely inadequate service is an unreasonable burden for residents who depend on a reliable water supply for basic necessities.

We respectfully ask for your assistance in bringing this matter to the appropriate authorities and requesting:

1. An immediate investigation into the cause of the prolonged water shortage in Cambridge Subdivision;
2. A clear explanation and timeline from COWD regarding when normal water service will be restored;
3. Immediate measures to provide adequate water to affected residents while the problem remains unresolved; and
4. Proper monitoring and follow-up to ensure that the situation is actually addressed.

We are not asking for special treatment. We are simply asking for **reliable access to water, a basic necessity that every household should be able to depend on**.

We sincerely hope that your office can help us bring this matter to the attention of the responsible agencies and ensure that our community's concerns are finally addressed.

Thank you very much for your time and assistance. We would be grateful for any action your office can take on behalf of the affected residents of Cambridge Subdivision.

Respectfully,

Concerned Residents of Cambridge Subdivision
Iponan, Cagayan de Oro City
